Sustainable Development Strategy: Egypt Vision 2030

Nihal El Megharbel, PhD
First Assistant to the Minister of Planning, Monitoring and Administrative Reform

Workshop on National Development Strategies and Plans for the Middle East & Central Asia Region

October 27th 2015
Egypt started to prepare the Sustainable Development Strategy (SDS): Egypt Vision 2030.

**Methodology:**

- Participatory Approach
  - Intensive workshops embracing expertise, academics private sector and civil society representatives.
  - ILO, UN Women, USAID, JAICA and World Bank providing consultancy and technical assistance.
- Building on previous experience
  - GOE strategies, sectoral strategies, population strategy
  - Best practices and previous experiences
- Compatibility between the SDS and the (SDGs).
Constituents Of SDS

- Economy (measured in GDP)
- Fighting Corruption
- Egypt in top 30 Globally
- Human Capital
- Happy citizen

Competitive Market
SDS 12 Pillars

- Education
- Economic development
- Environment
- Knowledge, innovation and scientific research
- Transparency and efficiency of governmental institutions
- Urban development
- Heath
- Energy
- Domestic policy
- Social justice
- Culture
- Foreign policy and national security
- Energy
- Domestic policy
- Foreign policy and national security
Constituents Of SDS

General Goal

- By 2030, the pillar is characterized by…… and capable of…….

Subsidiary Goals

- Dividing the general goal into a number of sub goals.

Key Performance Indicators

- For each sub-goal a number of KPIs is set to evaluate input-output nexus and outcomes (the vital few)

Policies, Programs and Projects

- Time frame and reference cost contributing to general goal achievement.

Take advantage of the experience and previous similar efforts

Determining the Quantitative targets

Review Previous Studies

Learned Lessons from Comparative Studies

Status Quo

Review various quantitative targets compatibility and integration with each other to ensure the achievement of desired strategic objectives.

Review Comparative Studies

Economic Development

A market Economy characterized by a stable macroeconomic environment, capable of achieving sustainable inclusive growth, a knowledge-based competitive and diversified economy, an active player in the world economy, capable of adjusting to international developments and of maximizing value added, able to generate decent and productive jobs, and can achieve a high-middle income countries GDP per capita.
Examples of Education KPIs

- Illiteracy reduced to the zero default (7%)
- One of the top 30 countries in the quality of basic education index
- Gross enrollment ratio for children at the age of 4-6 reaches 80%
- At least ten Egyptian universities are among the top 500 universities
- Egyptian universities among the best 20 higher education institutions publishing in international periodicals
- Egypt to become one of the top 10 countries in the TIMMS assessment
Examples of Innovation, Knowledge & Scientific Research KPIs

- Egypt among the top 40 countries in the field of innovation
- Egypt among the top 40 countries for the number of patents
- Egypt among the top 40 countries of quality of scientific research institutions
- Egypt one of the top 20 countries in Intellectual Property Rights
- Egypt one of the top 20 countries in retaining innovative talents and capabilities
Examples of Health KPIs

- Reduce neonatal, infant and under 5 mortality rate by 50%
- Reduce maternal mortality by 60%
- Achieve equitable access to 80% of essential health interventions
- Government spending on health reaches to 5% of the total GDP
- Ensure 100% coverage for each vaccination and expand national immunization schedule

Ensure 100% coverage for each vaccination and expand national immunization schedule
Data and Challenges

- The importance of data at the regional level:
  - Provides more accurate results compared to averages at the national level.
  - Helps to draft and implement appropriate region-specific policies for economic and social issues.

- Challenges in Indicator Calculation
  - Human Resources challenges: availability of expertise capable of data collection, calculation and analysis of indicators.
  - Availability of modernized, accurate, merged and overarching databases.
  - Develop a framework for coordination between the concerned authorities to efficiently implement as allowing for the implementation of these goals more efficiently.
  - Take advantage of the indicators in identifying gaps, assessing needs, setting priorities and drafting policies.
### Summary of data availability for indicator computation

*Common indicators are included in all of the United Nations sustainable development goals and national sustainable development strategy*
The Way Forward

- Holding intensive workshops between the different society actors (including civil society, private sector, government representatives, experts and academics) to discuss the indicators and integration mechanisms into the planning and monitoring system.

- Holding specialized training courses to prepare expertise capable of data collection and indicators calculation and analysis.

- Agreeing on data requirements, collection methodology and the role of agencies.

- Providing funding and technical assistance from international institutions.

- The development of a national action plan for data collection and indicators assessment, including a matrix of responsibilities and timeframe. In addition to, the agreement on the reports (content, methodology and periodicity).

- Agreeing on a unified Arab stance and the exchange of regional experiences, information and resources.
